

AS9100D ISO 9001:2015 ITAR REGISTERED CMMC COMPLIANT

Precision Manufacturing for Aerospace & Defense

Tight-tolerance, high-reliability machined components utilizing the latest technologies for project solutions.

Long-Term Production Support

We invest in the equipment, systems, and people that make that possible at production scale. That means consistent dimensional accuracy, verified surface integrity, full material traceability, and a supplier whose quality system can stand behind every shipment.

Capabilities

Large CNC Turning

Multi-axis CNC turning services handle a broad range of diameters and materials used in aerospace and defense applications.

Horizontal Milling

3 and 5-axis machining that handles complex geometries and tolerances across a wide range of part sizes without sacrificing quality.

Metrology & Inspection

Our metrology and inspection services built to give you confidence from first article inspection through full production runs.

Complex Manufacturing

Manufacturing services designed to support programs from development, tooling, and major assembly.

Ready to Start Your Next Program?

Tell us about your program requirements and we'll put together a manufacturing plan.
